PT TOKYU LAND INDONESIA Accelerating Indonesian COVID-19 Vaccination

Jakarta, October 30th 2021 — In order to support the Government of Indonesia towards vaccination program, PT Tokyu Land Indonesia (Headquarter: Jakarta DKI, President Director: Hidetatsu Ikeda) held Covid-19 vaccination for 1,000 doses centered in BRANZ BSD Marketing Gallery, Kabupaten Tangerang, Banten, Indonesia which has been carried out in September 18th and October 30th, 2021.

§ Foot Prints of PT. Tokyu Land Indoensia

PT. Tokyu Land Indonesia —a member of Tokyu Fudosan Holdings Corporation, one of Japan's leading comprehensive developers—from 1975 began to contribute to Indonesia by collaborating with Indonesian local companies in improving the nation's economy and participating in providing decent housing for the people of Indonesia. Until these days, we have supplied around 5,000 residential units and over 2,200 condominium unit - we are proud to have been entering Indonesia for the longest time among major Japanese developers, and we will continue our efforts to contribute to Indonesia.

These past 2 years are the tough years for all parties including us as a developer. Many businesses are experiencing bottlenecks, the government periodically imposes restrictions on the entire community. However, we believe that one day with the collaboration and obedience of the entire community, we can back to live normal. During this tough national condition, we believe that this is an occasion for us as a Japanese developer to take action towards community by contributing in the health sector so that together we can achieve conditions for Indonesia to live normally and coexist with this pandemic.

§ Background of providing vaccination.

As Indonesia targeting to achieve herd immunity from Covid-19, 70% of the total population of Indonesia or 189 million must receive a full vaccination (two doses of Covid-19 vaccine). According to data from the Ministry of Health on October 28th, 2021 (vaksin.kemendes.go.id), only around 54% of Indonesians have received the first vaccine and around 33% have received the second vaccine (fully

vaccinated). To speed up the vaccine process, Tokyu land Indonesia in collaboration with Djajakusumah Hospital open a vaccination center, located in the BRANZ BSD Marketing Gallery, Tangerang, Banten.

The vaccination center in collaboration between TLID and Djajakusumah Hospital is open to public Indonesia, aged, and also foreigner who lives in Indonesia especially in the surrounding of Greater Jakarta Area. It was held on September 18th, 2021 and October 30th, 2021. The vaccine was the Astra Zeneca and Pfizer.

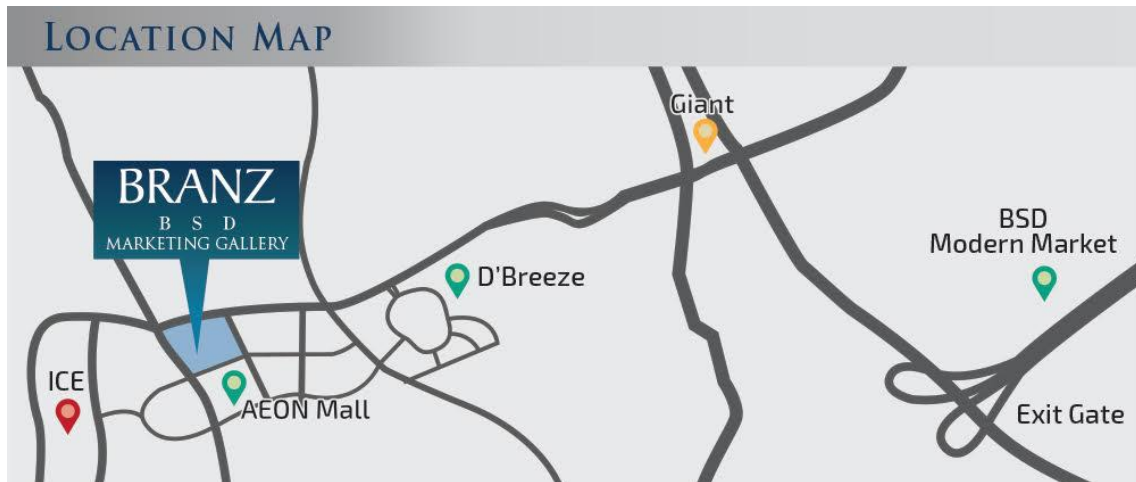

§ CSR Activity

This collaboration is a form of Tokyu Land Indonesia's CSR program, which is currently entering their 9th years since its establishment in 2012. This collaboration with Djajakusumah Hospital is expected to help the government to achieve the target of communal immunity and TLID can provide greater benefits for the community and TLID can continue to carry out CSR that is sustainable and has a direct impact to the community. Likewise, TLID regularly holds CSR activities every year. For example, in early 2020, we held a CSR activity in the Bogor area, that targeting the nature conservation and groundwater conservation by planting trees, and in 2019 we plant some mangrove in the northern area of Jakarta.
